Portfolio:

Professional Summary

Motivated and creative aspiring software developer with interests in Python development, artificial intelligence, robotics, web development, and cybersecurity awareness. Passionate about building impactful digital tools and creating educational technology content. Currently expanding technical skills through hands-on projects, programming practice, and application development.

Technical Skills

Programming Languages

- Python
- JavaScript
- HTML5
- CSS3

Web Development

- Responsive Web Design
- Frontend Development
- Git & GitHub
- Basic Backend Concepts

Tools & Technologies

- VS Code
- GitHub
- Command Line
- AI Tools
- Canva

Areas of Interest

- Artificial Intelligence
 - Robotics
 - Cybersecurity Awareness
 - App Development
 - Content Creation
-

Projects

Luo Voice Spellcaster (Python Project)

- Designed a creative command-line Python game featuring Luo-language spells, narration, animations, and sound effects.
- Applied Python programming concepts including functions, loops, conditions, and modular design.
- Focused on user interaction and entertainment through localized language experiences.

Business Tracking Application

- Planned and designed an application intended to help small businesses track profits and losses.
- Focused on simplifying financial tracking for everyday users.
- Worked on project structure, feature planning, and user-focused design.

Portfolio Website

- Built a personal portfolio website to showcase development projects, technical skills, and future goals.
- Implemented responsive layouts and modern web design principles.

Cybersecurity Awareness Content

- Developing educational content aimed at helping users avoid online scams and improve digital safety.
 - Exploring video narration and technology education through online platforms.
-

Education

University Student

Currently pursuing higher education with a focus on technology and computer science-related learning.

High School Certificate

Completed secondary education.

Experience

Independent Developer & Tech Learner

2024 – Present

- Continuously learning software development and programming through personal projects and online resources.
 - Building practical applications and experimenting with creative technology ideas.
 - Exploring AI tools, automation concepts, and software design.
-

Certifications & Learning

- Python Programming (Self-Learning / Online Resources)
 - Web Development Fundamentals
 - Introduction to Artificial Intelligence Concepts
 - Cybersecurity Awareness Research
-

Strengths

- Problem Solving
 - Creativity
 - Fast Learner
 - Communication
 - Team Collaboration
 - Adaptability
-

Languages

- English
 - Swahili
 - Luo
-
